With respect to claim 9, the primary reason for allowance is the structural combination of generating a test transaction in a test module coupled to an input/output (I/O) controller using a first connection that is separate from a second connection that is configured to couple the I/O controller to one or more I/O devices and separate from a system bus coupled to a processor, the test module and the I/O controller included in a chipset coupled to the memory and the system bus; providing the test transaction from the test module to the I/O controller using the first connection;

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
